## ⚠ Dispatch & E-Tickets

- Capture electronic signatures from a smartphone or tablet at beginning and end of job

- Require employees to complete and attach pre-job inspection, site safety, and other checklists before moving to next stage of the job

- Dispatch can view E-Ticket status in real-time view

- Use E-Tickets in offline mode when out of cellular and Wi-Fi range

- Tickets are stored in the database and cannot be lost like paper tickets

- Attach pertinent documents to E-Tickets – lift plans, permits, and more

- Verify employee location with geo-tracking when capturing signatures and time stamps

- Automatically email E-Tickets to customer when first and second signatures are captured

⚠ Terms & Conditions

- Single and multi-state T&C templates can be setup for various documents and defaulted based on company or yard, or manually selected

- PDF documents, such as quotes, rental agreements, delivery contracts, and more can be generated and emailed directly or through DocuSign to capture signatures

- Documents and files can be attached for easy look up and access

- Attach pertinent documents to E-Tickets – lift plans, permits, and more

- Automatically email E-Tickets to customer when first and second signatures are captured

Maintain a digital record of critical documents

⚠ Certifications

- Require certifications for customers, job sites, and units to ensure the appropriate employees are assigned; with pop-up notifications of potential conflicts

- Employees can access their own certifications for verification through Atom

⚠ Audit Trail

• Coming due and past due certifications

• Engine hour and odometer meter history

• Power BI dashboards for service managers

Maintain a digital record of critical documents

⚠ Document Management

- T&C templates can be setup for various documents and defaulted based on company or yard, or manually selected

- PDF documents, such as quotes, rental agreements, delivery contracts, and more can be generated and emailed directly or through DocuSign to capture signatures

- Documents and files can be attached for easy look up and access

⚠ ELD & GPS Integration

- Import unit engine hours, mile, and location from GPS systems to build an audit trail of equipment usage

- Import hours of service from ELD systems to enable dispatchers to maintain compliance when scheduling employees
