

ATOM Product Release Notes

2020 Q4 General Release, December 2020

Atom API Version: 2020.4.1.2

Includes all changes since Atom version 2.4.68

RELEASE DEPENDENCIES

- Release includes Atom API Version 2020.4.1.2, Atom for Android 2020.4.1.2 & Atom for iOS 2.2.96
- Requires NexGen Version 2020.4.7.1

NEW FEATURES & ENHANCEMENTS

- **NexGen WPF Compatibility** – Changed the application to ensure compatibility with new NexGen WPF Job Screen functionality, database changes and other WPF-specific requirements.
- **Update Quote Footers** – Changed the Footer field on the Quote screen to be editable.
- **MSHA Jobs** - Added MSHA checkbox to the job screen and to the customer job site screen to be able to track MSHA jobs.
- **Add Labor to Work Order** - Added a validation to check for a closed Work Order when adding labor to a Work Order in Atom.
- **Android 11 File Link Icon Changes** – Corrected an issue for Android 11 where the File Link and Camera icons were not displaying properly.
- **Work Order Finished Work Checkbox** – Added a “Finished Work for the Day” checkbox to the Work Order labor screen.
- **Work Order Parts Lookup** – Added Part Description option to Work Order part code search.
- **Sales Assistant Enhancements** – For this release, a number of enhancements to Sales Assistant were made based on both planned enhancements and requests from our clients after the initial release. The enhancements and changes specific to Atom include:
 - **Emailing from Atom** – Previously, we sent an email from the account configured in the system-wide email settings for Atom, which was causing problems for some users of Office 365 due to recent security changes at Microsoft. Now, we send the email directly from the Assigner’s account as configured in **Admin > Users**. This addresses the O365 configuration challenges and provides a more consistent user experience since NexGen-assigned Tasks and Atom-assigned Tasks will come from consistent addresses. In the cases where a user does not have a defined account, we attempt to send from the System account.

ATOM Product Release Notes

- See NexGen 2020.4.7.1 Release Notes for additional information on Sales Assistant enhancements.

SOFTWARE ISSUES ADDRESSED IN THIS RELEASE

- **Trucking Ticket Ship to/from** – Ship to/from were reversed on trucking tickets. Corrected to display them properly in Atom. (Case #18841)
- **Error Updating Device Registration** – Corrected an Issue When Updating Owner/Location Field on the Registration Screen. (Case #18694)
- **Unit Certification File Links Issue** – Corrected a document-type mismatch with Unit Activity and Unit Certification. (Case #18668)
- **Atom Exception Errors** – Fixed various Atom Exception errors. (Multiple cases)

DOCUMENTATION & TRAINING
